Child Survival Technical Support+

Who we are

- CSTS+ is a support team providing technical assistance to **_funded_** Child Survival and Health Grants.

CSTS+ activities are designed to:

- Assist the Bureau for Global Health/Office of Health, Infectious Disease and Nutrition (GH/HIDN) in its performance monitoring and management of the Child Survival & Health Grants Program

Child Survival Technical Support+

CSTS+ activities are designed to:

- Assist the Bureau for Global Health/Office of Population & Reproductive Health in its performance monitoring and management of the PVO/NGO Flexible Fund.

CSTS+ activities are designed to:

- Facilitate grantee access to useful resources on design, implementation, monitoring, and evaluation of child survival and health programs.

Child Survival Technical Support+

CSTS+ Activities are Implemented in Partnership with:

- BGH Staff

- The CORE Group

- PVO Grantees

- Other CAs supporting Global Health Initiatives

CSHGP PROJECTS

Welcome to CSTS+

CSTS+ marks a transition from the previous CSTS contract to a support mechanism that will allow USAIDs Bureau for Global Health (BGH) to further connect its PVO, Cooperating Agency, and Mission partners.

This new contract allows the CSTS+ team to build upon the foundation created under the original CSTS contract and to continue providing services to the PVO community and supporting CORE in priority activities. It also allows us the opportunity to adapt our experience and lessons learned to serve a broader group of customers, including the Bureau of Global Health's PVO/NGO Flexible Fund.

CSTS+ technical staff continue to be available to PVOs to answer
